

1. iST's conditions and notification for HDMI 2.1 CAT3(Category 3)cable

- HDMI adopter identification is a must.
- A HDMI 1.4b certification must be obtained before a HDMI CAT3 certification can be made.
- An EMI testing shall be added in HDMI CAT3 certification. The EMI testing laboratory should be certified in IEC/ISO 17025 and able to perform CISPR32 testing, and is licensed by HDMI Forum (ATC, Authorized Test Center).
- The HDMI CAT3 cable connector selected must be certified by HDMI 2.1CAT3 certification.
- Customers should provide three cable samples to the ATC, and the samples shall be labeled and retained for 2 years after completion of the test.
